Subject: FW: EPA data packages for Feb 5

I'm ok with sending Willowbrook data for Feb 8th as well.

Lewis –

We would need both your data packages and Ramboll's data packages to review in advance of the call. Otherwise, I don't see how the joint call could be mutually productive. My understanding is that Sterigenics didn't start co-located sampling until February 8th. So, perhaps you should submit to us your data packages from 2/5 and 2/8 and Ramboll should submit to us their data packages from 2/8 to review. Thereafter, we could schedule a call and have a more informed and productive discussion on testing.

Subject: EPA data packages for Feb 5

Tim:

We are reviewing the data packages right now for the Feb 5 EtO samples. We will transmit as soon as our review is complete.
